

"There are just over 200,000 cell towers in the U.S., but there may be millions of small cell sites in the 5G future."

FCC Chairman
Tom Wheeler

5G Killer Technology

$$5G = 4G \times 65000$$

SMALL CELL / MICRO CELL / ENODEB ANTENNAS

Millimeter wave body scanners in airports heat your body at the cellular level, the same way a microwave oven heats up a bowl of soup. A World Health Organization report reveals the waves not only heat the skin but can also **damage eyesight and cause cancer – especially skin cancer.**

HI I'M JOHN PATTERSON

IG: CONNECTING CONSCIOUSNESS

I was a senior telecommunications officer for Telstra in Australia, responsible for the deployment of thousands of cell towers. When I discovered that the towers emit microwave radiation 50,000X higher than the legal limit, I sent a report into head office pleading them to do something. I was fired within 48 hours. So to get the word out, I took my friends tank and destroyed 8 tower sites. I was sentenced and served 20 months in jail, and I don't regret it. People need to know.
